GAURAV GUPTA

Senior Product Manager | Builder | Ex-Founder
Jaipur, India | +91 95717 06464 | ar.gaurav20@gmail.com | linkedin.com/in/ar-gaurav | gauravg.dev | github.com/argaur

PROFESSIONAL SUMMARY

Senior Product Manager with 7+ years in product, from enterprise platforms to my own builds in health, commerce, travel, finance and government portals. At JindalX, owned a portfolio of 7 B2B SaaS products across 16 enterprise clients and 5,000+ users, and delivered 30+ digital transformation initiatives on time. Results include hiring time cut 50%, 30% transaction growth and 50% shorter audit cycles. Since June 2025, 15 projects across 11 domains, from live products to research concepts. I turn product ideas into working specs and prototypes.

EXPERIENCE

RETHINK SYSTEMS | Jaipur

Product Consultant | Jul 2026 to Present

- 0-to-1 products across the full lifecycle, from problem framing and requirements through build, deployment and iteration.

Mentor, AI Building, Cohort 8 | Jul 2026 to Sep 2026

- Coached practicing Product Managers on using Claude and AI tooling to move from an idea to a shipped, working product. Returned as a mentor after completing Mastering AI Product Management, Cohort 7.

INDEPENDENT | Jaipur

Independent AI Product Builder | Jun 2025 to Present

- 15 projects across 11 domains, from live products to research concepts. Each one is listed with its status at gauravg.dev.
- Part of a 6-person team that placed 3rd at the Rethink AI-First Buildathon, shipping Vitae, an AI health-records PWA, in a 10-day sprint.
- With a teammate, placed in the Top 250 (rank 64) of about 13,700 applicants at Build What Moves India (Varun Mayya x OpenAI), shipping a working GST-notice prototype.
- Built a Telegram AI assistant (28+ commands) on Claude API and Python. It is now retired, and it became the brief for life-os, a personal operating-system app in build.

JINDALX | New Delhi

Senior Product Manager, Digital Transformation | Jun 2022 to May 2025

7 B2B SaaS products | 16 enterprise clients | 5,000+ users | 30+ initiatives delivered on time

- Led 2 Product Managers, 2 Business Analysts and 2 product interns. Owned a portfolio across talent management, performance evaluation, knowledge management, CRM, HRMS, quality auditing and BI. Results include hiring time cut 50%, 30% transaction growth and 50% shorter audit cycles.
- Talent Management Suite: moved hiring from Excel and paper to one system. Six linked specs, from requisition to onboarding, written and built by me. One OpenAI call at screening. Hiring time cut 50%.
- Performance Management Platform (Xcellence): built on Airtable + GenAI for enterprise teams. Reduced manual review effort through AI-assisted recommendations and structured workflows.
- Knowledge and Learning Platform (Insight): AI-powered knowledge base and L&D platform for 5,000+ employees, with intelligent search and chatbot integration.
- CRM and Auction Platform (AuctionIT): end-to-end auction lifecycle and CRM management. A UX redesign drove 30% transaction growth.
- HR Management System (Touchpoint): purpose-built HRMS for 5,000+ floating BPO agents, with shift scheduling, payroll, multi-state compliance and ERP integration.
- Quality and Auditing Platform (AQUA): cloud-based quality auditing and compliance with enterprise-wide governance and UAT. BI Platform (Jx Data Cloud): unified data warehouse with Power BI dashboards and automated KPI alerts.

ONEVALLEY | Gurugram

Product Manager | Sep 2020 to Jul 2022

- Owned product strategy, roadmap and sprint delivery for PassportOS, a B2B SaaS startup-ecosystem platform serving universities, banks, accelerators and corporate incubators. Ran requirements, sprint delivery and KPI reporting across enterprise clients, including Queens University.

- Contributed to Passport (B2C founder platform) and the Entrepreneurship World Cup platform across 200+ countries: application intake, judging workflows and multi-stakeholder coordination.

TACCOMACCO EDUTAINMENT | Gurugram

Co-Founder and COO | Jul 2017 to Sep 2020

- Co-founded a digital content platform from 0 to 1. Took a B2C subscription reading app from concept to launch on Android and iOS, owning pricing, content architecture and go-to-market end to end.
- Built the internal CMS and publishing infrastructure that shipped 500+ digital titles.
- Ran a creator incubation program and mentored 6+ creators from idea to published product. Covered by YourStory.

RSP DESIGN CONSULTANTS | Gurugram

Design Manager, Architecture | Sep 2014 to Jun 2017

- Managed 40+ architectural projects across IT, healthcare and institutional sectors. 95% client retention and 25% delivery time reduction.

SELECTED PROJECTS

- SitelineCRM, B2B SaaS, public demo: a Telegram-native sales CRM for a coworking aggregator. Solo build in about 51 hours, with an eval harness.
- PM Pathfinder, EdTech, public demo: a 10-question career diagnostic with a retrieval chatbot grounded in real PM frameworks, on a pgvector database I deployed.
- Notice, Explained, Govtech, rank 64 of about 13,700: traces a GST notice mismatch row by row, so a taxpayer sees the evidence before writing a reply. Team of 2.
- Vittam, Personal Finance, public demo: a household finance PWA, built solo for my own family. Encrypted in the browser.
- Vitae, Health Tech, public demo: prescriptions a family can read. Team of 6 with shared ownership.
- Blinkit Command Hub, Quick Commerce, public demo: an independent prototype that ranks the exceptions a dark store manager must act on first.
- Trivo, Travel, public demo: a group travel planning platform, from pain points to a working PWA.
- YouTube 2.0, Consumer Media, research concept: three prototypes for finding deep content, not just popular content.

SKILLS

Product: Discovery and roadmapping | Go-to-market | OKRs and prioritization | Agile and Scrum (CSM, CSPO) | Stakeholder mapping | Cross-functional delivery | UX research | UAT, release and change management

AI and Automation: RAG pipeline design | AI evaluation | Prompt engineering | Claude and Gemini APIs | OCR to structured-record pipelines | Airtable | n8n (personal workflows)

Data and Tools: SQL and analytics (funnel, cohort) | Python | PostHog | Looker Studio | Power BI | Supabase | Docker

---
