7	Summary of Experience: Senior Product & Project Manager with 10+ years of experience delivering enterprise-scale digital platforms and AI-enabled systems within regulated, compliance-driven environments. Proven track record of owning program-level delivery, governance, data privacy alignment, and multi-vendor coordination across large IT initiatives. • HR Technology & Workforce Platforms • ERP & Enterprise Systems • ETL Pipelines, Data Warehousing & Analytics • Quality & Performance Management Systems • EdTech • Healthcare Platforms • Financial & FinTech Systems • Digital Transformation Programs • Generative AI & Intelligent Automation • Autonomous & Workflow-Driven Platforms With strong exposure to PMO-style structured planning and milestone control, RAID management, Compliance-linked reporting, and transition management. Combines hands-on product leadership with structured delivery discipline across complex, multi-stakeholder environments. CSM Certified: Certificate ID: 001760465, Badge ID: 2087011 CSPO Certified: Credential ID: 001760465, Badge ID: 2102661			
8	Key Skills: Program, PMO & IT Governance • Enterprise PMO Governance & Multi-Stream Program Delivery • Milestone, Dependency & Critical Path Tracking • RAID Management (Risk, Assumptions, Issues, Dependencies) • Scope, Change & Configuration Control • Executive Reporting & Leadership Dashboards • Stakeholder & Vendor Management • Delivery Assurance & Operational Transition Management • Audit-Ready Documentation & Compliance Reporting			

	Product Leadership • Product Strategy, Roadmapping & Lifecycle Management • Enterprise SaaS & Platform Portfolio Management • Agile / Scrum Delivery aligned to SDLC & IT Controls • Release Management, UAT & Go-Live Readiness • KPI Definition & Performance Measurement Frameworks • API-Led Architecture & System Integration Oversight • Data Analytics, MIS & Business Intelligence Reporting AI & Emerging Technologies • Generative AI Integration in Enterprise Platforms • Intelligent Workflow Automation • No-Code / Low-Code Architecture (Airtable, Zapier, Make, n8n) • Data-Driven Decision Systems • ETL & Enterprise Data Integration (SSIS) • Third Party Integrations & AI-Enabled Platforms
9	Work Undertaken that Best Illustrates the Required Professional Experience <u>Project 1: AI-Powered Talent & HR Platforms (ATS, IJP, HRMS)</u> Year: 2023–2025 Organization: JindaIX Position Held: Senior Product Manager – Digital Transformation Main Features: Enterprise HR platforms supporting 5,000+ users across 16 clients, designed with strong emphasis on data privacy, access control, and regulatory compliance. Technology: Generative AI APIs, Airtable (Advanced), REST APIs, SQL Activities Performed: • Defined product vision, roadmap, and release strategy across ATS, IJP, and HRMS platforms. • Designed and implemented Generative AI-driven workflows for candidate screening and job matching. • Led multi-stream program delivery including planning, sprint execution, and milestone tracking. • Managed no-code development initiatives and guided product and implementation teams. • Coordinated cross-functional stakeholders (HR, Operations, IT) and external vendors. • Maintained RAID logs, tracked dependencies, and ensured structured governance reporting to leadership. • Led large-scale IT programs in regulated environments, ensuring adherence to data privacy, security, and compliance frameworks across the project lifecycle. • Oversaw UAT cycles, go-live readiness, and transition to business and operations teams.

Project 2: Enterprise BI & Data Platform (Jx Data Cloud)

Year: 2022–2025

Organization: JindalX

Position Held: Senior Product Manager – Digital Transformation

Main Features: Centralized data warehouse and real-time analytics dashboards consolidating enterprise data.

Technology: SQL, Power BI, SQL Server Integration Services (SSIS)

Activities Performed:

- Defined product scope and roadmap aligned with data governance, retention, and privacy policies.
- Designed enterprise data architectures compliant with data protection, confidentiality, and regulatory requirements.
- Ensured architectural alignment with cloud governance, data localization, and regulatory constraints for on-prem and cloud deployments.
- Led cross-functional coordination for ETL implementation and system integrations.
- Governed milestone tracking, delivery timelines, and stakeholder reporting.
- Defined KPI frameworks and executive dashboards for decision-making.
- Oversaw UAT validation and ensured structured rollout across business units.

Project 3: Performance Management Platform (Xcellence)

Year: 2023–2025

Organization: JindalX

Position Held: Senior Product Manager – Digital Transformation

Main Features: Enterprise performance evaluation system with automated scoring and feedback workflows.

Technology: Generative AI APIs, Airtable (Advanced), REST APIs, SQL

Activities Performed:

- Implemented automation-led performance scoring workflows reducing manual intervention.
- Owned product lifecycle from requirement gathering to phased enterprise rollout.
- Led no-code development and automation workflows across performance processes.
- Defined feature prioritization and release planning aligned with business goals.
- Managed stakeholder reviews, risk tracking, and milestone governance.
- Coordinated UAT execution and ensured adoption across departments.

Project 4: Knowledge Management & Learning Platform (Insight)

Year: 2022–2024

Organization: JindalX

Position Held: Senior Product Manager – Digital Transformation

Main Features: AI-enabled knowledge management and learning platform for BPO operations.

Technology: PHP / .NET–based application, Microsoft Azure libraries, REST APIs, SQL database, third-party tool and service integrations.

Activities Performed:

- Defined product roadmap and functional requirements for knowledge system.
- Coordinated engineering, content, and operations teams for structured delivery.
- Managed system integrations and tracked cross-functional dependencies.
- Supported implementation of AI-enabled knowledge search and response workflows.
- Governed delivery timelines, risk management, and leadership updates.
- Led UAT planning, phased rollout, and operational handover.

Project 5: B2B CRM & Auction Platform (AuctionIT)

Year: 2022–2025

Organization: JindalX

Position Held: Senior Product Manager – Digital Transformation

Main Features: B2B CRM integrated with auction management workflows, designed for secure transactions and compliance with enterprise IT controls.

Technology: PHP / .NET–based application, Microsoft Azure libraries, REST APIs, SQL database, third-party tool and service integrations.

Activities Performed:

- Led product planning and roadmap execution aligned with IT policies and regulatory obligations.
- Ensured compliance with IT policies, regulatory standards, and internal control frameworks.
- Coordinated development teams and external integrations across systems.
- Managed scope, change requests, and delivery timelines.
- Facilitated stakeholder communication and executive progress reporting.
- Oversaw UAT, release management, and transition to operational teams.

Project 6: Quality Management & Auditing Platform (AQUA)

Year: 2022–2024

Organization: JindalX

Position Held: Senior Product Manager – Digital Transformation

Main Features: Cloud-based quality auditing and compliance management solution.

Technology: PHP / .NET–based application, Microsoft Azure libraries, REST APIs, SQL database, third-party tool and service integrations.

Activities Performed:

- Defined product requirements and implementation roadmap for quality and compliance workflows.
- Led cross-functional coordination for enterprise system integrations.
- Managed delivery governance including milestone tracking and risk mitigation.
- Ensured structured reporting to leadership on progress and compliance metrics.
- Oversaw UAT cycles and ensured smooth operational transition post-deployment.

Project 7: Entrepreneurship World Cup Platform (Passport & PassportOS)

Year: 2020–2022

Organization: OneValley

Position Held: Product Manager

Main Features: B2C and B2B entrepreneurship platforms supporting global startup programs.

Technology: Confluence (platform base), REST APIs, SQL, third-party service integrations, SaaS ecosystem integrations.

Activities Performed:

- Owned product strategy, roadmap planning, and feature prioritization for B2C and B2B platforms.
- Coordinated global stakeholders, engineering teams, and ecosystem partners.
- Managed sprint planning, milestone tracking, and structured release governance.
- Defined KPIs and monitored product performance across programs.
- Led UAT cycles and supported rollout across international cohorts.

Project 8: Digital Content & Publishing Platform

Year: 2018–2020

Organization: Taccomacco Edutainment Pvt Ltd

Position Held: Co-Founder & COO

Main Features: Digital content publishing platform supporting 500+ titles.

Technology: Android App, iOS App, PHP-Based Publishing Dashboard, CMS Workflows

Activities Performed:

- Led end-to-end product conceptualization, roadmap definition, and launch planning for mobile applications.
- Coordinated app development and backend dashboard implementation teams.
- Managed release schedules, scope alignment, and stakeholder communication.
- Established structured publishing workflows and operational governance practices.
- Oversaw testing, deployment, and scaling of Android, iOS, and publishing platforms.

10. Certification:

I, the undersigned, certify that to the best of my knowledge and belief, this CV correctly describes me, my qualifications, and my experience. I understand that any wilful mistake described herein may lead to my disqualification or dismissal, if engaged.
