PROFESSIONAL SUMMARY

Senior Product Manager with 10+ years of total experience, including 7+ years in product (from the first research through launch and closure of my own startup product, then B2B SaaS) and 3+ years as a Senior PM. 3 years of GenAI work and 2 years building AI products. At JindalX, led 7 B2B SaaS products for 16 enterprise clients and 5,000+ users, with results including 50% faster hiring, less manual review effort, and 30% transaction growth. Earlier, co-founded a B2C digital reading content startup for about 3 years and worked 2+ years in architecture. Builder-PM combining product strategy, user research, analytics, and hands-on GenAI delivery.

EXPERIENCE

RETHINK SYSTEMS | Jaipur

Product Consultant | Jul 2026 to Present

- Work on 0-to-1 products across the full lifecycle, from problem framing and requirements through development, deployment, and iteration.

Mentor, AI Building, Cohort 8 | Jul 2026 to Sep 2026

- Coached practicing Product Managers on using Claude and AI tooling to move from an idea to a shipped, working product. Returned as a mentor after completing Mastering AI Product Management, Cohort 7.

INDEPENDENT AI PRODUCT BUILDING | Jaipur

Self-employed | Jun 2025 to Present

- 13 builds across nine domains, including live products, case studies, and research concepts.
- Part of a 6-person cross-functional team that placed 3rd at the Rethink AI-First Buildathon, shipping Vitae, an AI health-records PWA, in a 10-day sprint.
- With a teammate, placed in the Top 250 (rank 64) of ~13,700 applicants at Build What Moves India (Varun Mayya x OpenAI), identifying a GST-notice-mismatch problem and shipping a working prototype.
- Built a Telegram AI assistant (28+ commands) on Claude API and Python, since retired. It became the brief for life-os, a personal operating-system app now in build.

JINDALX | New Delhi

Senior Product Manager, Digital Transformation | Jun 2022 to May 2025

7 B2B SaaS products | 16 enterprise clients | 5,000+ users | 30+ transformation initiatives

- Led 2 Product Managers, 2 Business Analysts, and 2 product interns. Owned roadmaps, prioritization, PRD walkthroughs, UAT, release, and change management, and presented status, architecture decisions, and blockers to C-suite and engineering leadership.
- Xcellence (performance platform, built on Airtable plus GenAI) for enterprise teams across 16 client organizations. Reduced manual review effort through AI-assisted recommendations, structured workflows, and automated 360-degree evaluations.
- ATS and internal mobility suite (built on Airtable, with AI-assisted screening): cut hiring time by 50%, measured on the talent-acquisition team scorecard, and moved hiring from spreadsheets and paper to one system.
- Insight (knowledge and learning platform): improved agent performance by 45%, cut onboarding time by 35%, and cut query-resolution time by 60% for 5,000+ agents. Led vendor selection and integration for AI-enabled knowledge search and a chatbot.
- AuctionIT (CRM and auction platform): grew transaction volume by 30% through UX redesign, automated bidding, auto-invoicing, and CRM-to-auction API integration.
- Touchpoint HRMS, AQUA auditing SaaS, and Jx Data Cloud: raised employee satisfaction by 25%, cut audit cycles by 50%, lifted compliance scores by 30%, and improved reporting accuracy by 40%.

- Introduced Airtable as an internal product platform and trained teams. Delivered all 30+ initiatives on time, and moved 80% of repetitive cross-functional tasks to automation.

ONEVALLEY | Gurugram

Product Manager | Sep 2020 to May 2022

- Owned strategy, roadmap, prioritization, and sprint delivery for Passport (B2C entrepreneurship platform) and PassportOS (multi-tenant B2B platform for universities, banks, accelerators, and corporate incubators).
- Drove product-market fit through user research, KPI tracking, and data-driven iteration. Led requirements, onboarding, and go-live for a university virtual-incubation partnership.

TACCOMACCO EDUTAINMENT PVT. LTD. | Gurugram

Co-Founder and COO | Jul 2017 to Sep 2020

- Co-founded a B2C digital reading content startup and owned the product from day one to closure: primary and secondary research, product creation, distribution, and closure. Built the product from concept to live Android and iOS apps, owning the roadmap, pricing, and go-to-market.
- Managed product, content, and strategy together. Trained authors and editors, and shipped 500+ digital titles through structured content and publishing workflows.
- Ran data analysis and company financial analysis. Built financial forecasts and pitched them to investors.
- Managed stakeholders across creators, developers, and investors. Designed an incubation program that took 6+ creators from concept to publication. Featured in YourStory and a local Jaipur newspaper.

RSP DESIGN CONSULTANTS | Gurugram

Design Manager, Architecture | Sep 2014 to Jun 2017

- Managed 40+ architecture and design projects across IT, healthcare, and institutional sectors. Ran feasibility studies, data analysis, and compliance management, and worked with clients and cross-disciplinary teams as the main stakeholder contact.
- Kept 95% client retention and cut team delivery time by 25% through milestone and dependency planning.

PROJECTS

- Vittam, Personal Finance PWA, Live: household financial planning product that consolidates where a family's money lives, runs five completeness checks, and recommends one next step.
- SitelineCRM, B2B SaaS and AI Extraction, Live: Telegram-based CRM that captures forwarded text, voice notes, and screenshots inside a sales rep's existing workflow. 93.5% extraction accuracy (129 of 138, self-reported) in an approximately 51-hour solo build.
- PM Pathfinder, AI and RAG, Live: 10-question diagnostic that maps users to 1 of 6 PM archetypes, with a RAG chatbot grounded in product-management frameworks. Built after 9 user interviews.
- Trivo, Group Travel Planning Platform, Consumer AI, Live: AI coordination layer that distributes planning tasks and surfaces conflicts early.
- Case studies on widely used products: Blinkit Command Hub, a peak-hour (6 PM to 10 PM) command hub that flags picker-level issues before SLA breaches, built with three research methods and a unit-economics model. YouTube 2.0, a long-form discovery redesign with four product interventions, backed by 171 survey responses and 27+ secondary sources.

SKILLS

Product: Product Strategy | Roadmaps | 0-to-1 Product Development | Product-Market Fit | Feature Prioritization | User Research | Product Analytics | A/B Testing | Go-to-Market | UAT | Release and Change Management
AI and Automation: Generative AI | Retrieval-Augmented Generation | AI Evaluation | Prompt Engineering | Workflow Automation | API Integration | Airtable
Data and Tools: SQL | Python | PostHog | Power BI | Looker Studio | Google Analytics | Jira | Confluence | Figma | Miro | Notion

EDUCATION

Bachelor of Architecture, B.Arch | Malaviya National Institute of Technology Jaipur (NIT Jaipur) | 2009 to 2014

CERTIFICATIONS

Mastering AI Product Management, Cohort 7 (Rethink Systems, 2026) | Certified Scrum Master and Certified Scrum Product Owner (Scrum Alliance, 2025) | Product Management Professional Certificate (LinkedIn Learning, 2025) | Google Analytics Certified (2025) | Airtable Admin and Builder (2024)
